

## SPEEDLINK **MEDICAL** EXPRESS ACROSS THE UK & EUROPE

### When medical shipments depend on speed

At SpeedLink, we have experienced personnel who are dedicated to the task of supervising the safe flow of medical & biological shipments. Regulatory, legal and logistical challenges are routinely solved.

No matter where consignments are required, SPEEDLINK MEDICAL EXPRESS delivers investigational medicines, biological samples or life sustaining equipment to destination anytime around the clock, every day of the year. Collection of shipments for return to your lab or facility are equally efficient.

Due to the sensitivity of contents, SPEEDLINK MEDICAL EXPRESS offers ambient, chilled or frozen shipping methods with capabilities of intercepting shipments during transit.

*“facility to 'live' track the delivery is so helpful”*

#### Here's how SPEEDLINK MEDICAL EXPRESS is a step ahead of the competition:

- Dedicated, direct drive service when required
- Options for ambient, chilled and frozen contents
- Online, real time GPS tracking
- Handling of biological contents such as UN3373 Category B
- Delivery pre-noon on the next possible business day
- Saturday or Sunday delivery options available
- Competency in handling dry ice as a refrigerant

*For ultimate speed and extreme flexibility, call our central booking number on 0208 037 7899*

# MEDICAL MEDICAL MEDICAL MEDICAL

## SPEEDLINK MEDICAL EXPRESS ACROSS THE UK & EUROPE

Medical shipments are an essential service requiring the utmost care and attention. SpeedLink has extensive experience in supporting the medical industry: stem cell banking, human tissue transport, drug trials and development, life sustaining equipment, documentation and general support.

### The significance of SPEEDLINK MEDICAL EXPRESS

Medical shipments are unique and with SpeedLink, each shipment benefits from the following support:

- A dedicated central point of contact
- Local contacts in each of the regions where shipments are destined
- Compliance to local or regional regulations for restricted contents
- Live, real time GPS tracking of shipments during transit
- Latest possible pickup times and pre-noon deliveries as standard
- Forward shipping of medical supplies and return shipping of samples or equipment
- Services tailored dependant on duration, geography, sensitivity and volume
- Desktop tracking of shipments
- All-inclusive pricing

### Take advantage of these optional services

Because every shipment is different, SpeedLink offers a variety of optional services and handling options to suit your needs:

- Packaging: Temperature controlled packaging in various sizes and shapes can be supplied in advance - providing protection and temperature control
- Coolant Material: Dry ice or gel packs arranged at shipment origin to control the content temperature through to delivery
- Billing Services: Flexible options for the billing of transport charges and taxes
- Pre-printed Waybills: These can be supplied in advance to simplify the return of medical shipments

*“a first class courier company”*
